

Figure 172

*NOTE 1 This value needs to be discussed and confirmed by the client. Other reflection factors are possible - the exact information about the surface material and quality of reflection should be obtained, in order to use the actual design parameters of the project.*

In the Project Tree, expand the folder 'Roadway 1', by clicking the '+' sign next to it. By selecting 'Valuation Field Roadway 1', which may specify the evaluation class according to the design parameters - see Figure 173.
