

maintained at the proper temperature 24 hours a day.

5. The Contractor shall visually inspect all products upon delivery and report any damage to the Engineer.
  - a. Any products damaged during delivery, storage or installation shall be marked by the Contractor and set aside.
  - b. Proposals for repair of any damaged products shall be submitted in writing to the Engineer for approval.
  - c. No repairs to damaged products shall be attempted without the Engineer's approval.
  - d. Any damaged products deemed unsuitable for repair by the Engineer shall be removed from site and replaced at the Contractors expense.

### **8.1.9 Pre-Installation Co-Ordination**

#### **A. Pre-Installation Conference**

1. Prior to the start of GRC installation, meet at the site and review the installation procedures and co-ordination with other work.
2. Meetings shall include Contractor, Engineer and Major material manufacturers as well as others whose work must be co-ordinated with the GRC work.

#### **B. Co-ordination with Inserts**

1. Ensure co-ordination between GRC work and concrete work such that all inserts and fasteners required for the proper installation of GRC work are correctly pre-installed.

#### **C. Pre-Installation Inspection**

1. Examine all parts of the supporting structure and the conditions under which the GRC work is to be installed.
2. Notify the Engineer in writing of any conditions detrimental to the proper and timely completion of the work.
3. Do not proceed with the installation of GRC work until unsatisfactory conditions have been corrected in a manner acceptable to the Engineer.

- D. The Work of this Section shall be completely co-ordinated with the work of other sections.
