

Values are nominal design 3-second gust wind speeds in miles per hour (m/s) at 33 ft (10m) above ground for Exposure C category. Linear interpolation is permitted between contours. Point values are provided to aid with interpolation. Islands, coastal areas, and land boundaries outside the last contour shall use the last wind speed contour. Mountainous terrain, gorges, ocean promontories, and special wind regions shall be examined for unusual wind conditions. Wind speeds correspond to approximately a 3% probability of exceedance in 50 years (Annual Exceedance Probability = 0.000588, MRI = 1700 Years). Location-specific basic wind speeds shall be determined using www.atcouncil.org/windspeed
