

2.3.1	Colour	30
2.3.2	Illuminance	30
2.3.3	Illuminance variation	31
2.3.4	Luminance and illuminance ratios	33
2.3.5	Room surfaces	34
2.3.6	Colour appearance	36
2.3.7	Colour rendering	36
2.3.8	Modelling and emphasis	36
2.3.9	Glare	37
2.3.10	Lighting of work stations with display screen equipment	38
2.4	Energy efficiency recommendations	39
2.4.1	Power and time	40
2.4.2	Energy efficient equipment	40
2.4.3	Lighting energy targets	41
2.5	Lighting schedule	42

Part 3

Lighting design

3.1	Objectives	64
3.1.1	Safety	65
3.1.2	Visual tasks	65
3.1.3	Appearance and character	65
3.1.4	Priorities and constraints	65
3.2	Specification	66
3.3	General planning	66
3.4	Daylight	67
3.4.1	Initial appraisal of daylight quantity	67
3.4.2	Daylight to enhance the general brightness of the room	67
3.4.3	Daylight for task illumination	68
3.5	Choice of electric lighting systems	70
3.5.1	General lighting	70
3.5.2	Localised lighting	71
3.5.3	Local lighting	72
3.6	Choice of lamp and luminaire	73
3.6.1	Selection of lamp characteristics	73
3.6.2	Selection of luminaire characteristics	74
3.6.3	Illuminance ratio charts	75
3.7	Energy management	78
3.7.1	Choice of controls	78
3.7.2	Human factors	80
3.8	Detailed planning	81
3.8.1	Costs and energy use	81
3.8.2	Maintained illuminance	86
3.8.3	Average illuminance (lumen method)	89
3.8.4	Specification and interpretation of illuminance variation	95
3.8.5	Discomfort glare	98
3.8.6	Emergency lighting	99
3.9	Design checklist	102
3.10	Statement of assumptions	104
