10.13. Dubai Municipality Environment Department

To evaluate the environmental aspects of the master plan design, an Environmental Impact Assessment (EIA) must be developed following DM's standards for the including all the environmental aspects and impacts expected from the project and proposed mitigation measures.

To ensure coastal protections and management, when relevant, an approval may be required to be obtained from the relevant division within the Environment Department. Additionally, if the implementation of any project, development, activity has a potential to cause change in the ecological character of any established protected and classified ecologically sensitive areas, an approval from the department may be required to be obtained.
