

- solicit their comments or concerns, and
- identify any betterment work to be included in the scope of the projects.

2.3.2.3 Final Design NOC

The primary requirement of the final design NOC is to:

- prepare the design drawings as per the preliminary design details, and
- confirm that all the agreed design requirements have been adopted to produce a quality deliverables as per the SAUP required standards.

Documentation Requirements

The requirements related to documentation are as follows:

- The NOC applications should be completed both in Arabic and English languages using the standard forms if available.
- The supporting documents to be submitted in the form of paper drawings (hard copies) and soft copies as part of the final design NOC application are listed in Table 3.
- All the drawings are to be submitted in size A1; such that the key plans are to be submitted on a scale of 1x20000 and the detailed plans, final ROW cross sections and standard drawings are to be submitted on a scale of 1x1000.
- The soft copies of all drawings are to be provided in DWF format. Although these documents would typically provide sufficient information to support the application, certain SAUP might request for additional information.
- The average processing time to review the required documents and issue the NOC is expected to be 3 to 6 weeks.
