

separation in minutes of arc of two neighbouring objects (points or lines or other specified stimuli) that the observer can just perceive to be separate.

**Visual comfort:** subjective condition of visual well being induced by the visual environment.

**Visual field:** area or extent of physical space visible to an eye at a given position and direction of view.

**Note:** the visual field may be either monocular or binocular.

**Visual performance:** performance of the visual system as measured, for instance, by the speed and accuracy with which a visual task is performed.
