

## 5.5 Bus Lay byes and Shelters

The bus lay bye is a special zone on the side of the main roadway at designated bus route in order to pick up and drop off passengers. The standard bus lay bye and associated shelter dimensions are presented in Figure 37 below.

Figure 37: Standard Details of a Typical Bus Lay Bye and Shelter

The utilities associated with the bus lay byes are limited and provide services to the shelter and other furniture such as kiosk or information boards. There is also certain level of flexibility in adjusting the coordinates of the bus lay byes to avoid any impact on existing utilities. For further details related to bus stop refer to the related public transport manual published by DoT.

## 5.6 Landscaping

The design details related to landscaping and associated utilities can be found in Roads Landscaping Manual and Standard Drawing Manuals published by DoT.
