

# 1. Introduction

## 1.1 Abu Dhabi Airports Company

Abu Dhabi Airports Company (ADAC) was created on the 4th March 2006 to spearhead the redevelopment of the Emirate's aviation infrastructure. To this end, it plays a key part in the Government of Abu Dhabi's Plan 2030. Wholly owned by the Abu Dhabi Government, the company is headquartered at its principal asset, Abu Dhabi International Airport.

Further details can be obtained from ADAC's website [www.adac.ae](http://www.adac.ae).

## 1.2 Purpose

The purpose of the occupant handbook is to provide future tenants direction on sustainable design and construction. It's anticipated that the occupant handbook and tenant fit-out guide (prepared by the Contractor upon construction completion) will form part of the lease agreements with ADAC and the corresponding tenants.

## 1.3 Version Control

This version of occupant handbook has been prepared to reflect the sustainability approach in design stage. The Contractor shall further develop this occupant handbook upon completion of the construction works to include updated sustainability requirements including, but not limited to;

- Maintenance requirement for the building performance.
- Actions to be implemented to ensure long term aspects of BMS & Facility Management are upheld as new techniques come into effect over the life span of the building.
