

Transition to Renewable Energy Production

Sources: Support Renewable Energy Policy in the Emirate of Abu Dhabi

- ADWEA support the concept of the introduction of renewable energy strategies, in the Emirate of Abu Dhabi's Water and Electricity Sector.
- In furtherance of such strategies, ADWEA in Conjunction with other entities will develop tariffs and adopt a multi-phased approach to technology selection in order to encourage and support the renewable energy companies to produce 5-7% of the required power capacity.
- Several Solar pilot projects are ongoing for technology selection and power and efficiency optimization purposes.
