

Figure 1-2: ADM Stormwater O&M Contract Boundaries

1.3 Scope of the Manual

The Manual provides operation and maintenance guidance for Abu Dhabi Emirate urban stormwater systems within the jurisdiction of Abu Dhabi Department of Municipal Affairs (DMAT). Sample jurisdiction of ADM is shown in Figure 1.2 and 1.3

The scope covers operation and maintenance of stormwater and subsoil drainage systems comprising collectors, conveyors, storage, retention and detention together with pumping facilities, outfalls and soakaways.

The scope does not cover the removal and discharge of visible surface ground water accumulations at low areas, landfills, agricultural irrigation water spills in open sand areas and sanitary sewers.
