

2.3.1 NOC Procedures

As per the procedure define by DAM/ADM and DoT for main roads, the consultant or the contractor needs to:

1. obtain NOCs from the affected utility provider,
2. obtain NOCs from DoT, and
3. submit the obtained NOC from DoT along with the NOC obtained from the affected utility provider to DMA/ADM to obtain the final NOC (construction permit).

In case, the new development(s) are being planned within the city limits and the main roads are having certain level of connectivity with the infrastructure of such developments, the consultant or the contractor needs to:

1. obtain the NOCs from the affected utility provider,
2. obtain the NOCs from UPC,
3. obtain NOCs from DoT, and
4. submit the obtained NOC from DoT and UPC along with the NOC obtained from the affected utility provider to DMA/ADM to obtain final NOC (construction permit) from DMA/ADM.

Figure 4 below, explains interdependencies between SAUP during the process of obtaining the final NOC for construction and maintenance activities.
