

6.2.1 Signalised Junctions

In addition to the general guidance provided, utility corridors arrangements at signalised junctions must also consider location and space requirements for equipment associated with traffic signals, including signal poles, above ground cabinets, ducts, etc.

Figure 6.2 shows an example of utility cabinets at an intersection

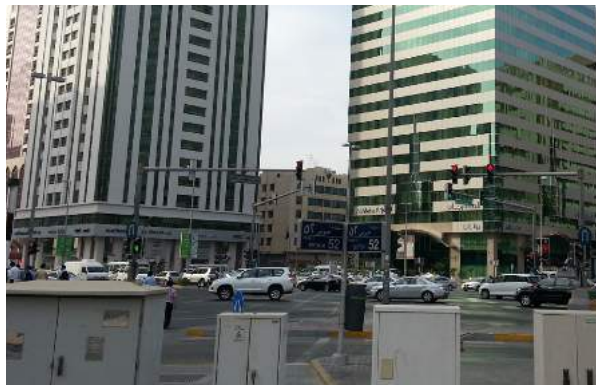

Figure 6.2. Example of electrical and signal cabinets at an intersection.

Figure 6.3 illustrates an example of utility corridors arrangement at a Boulevard/Boulevard signalised junction.
