

Figure 1.10 The organisation of the Munsell colour order system. The hue letters are B = blue, PB = purple/blue, P = purple, RP = red/purple, R = red, YR = yellow/red, Y = yellow, GY = green/yellow, G = green, BG = blue/green.

The existence of several other colour ordering systems, such as the Natural Colour System, the DIN system and BS 5252 system, would seem to be a recipe for confusion. This is avoided by the fact that conversions are available between many of the colour ordering systems. For more detail on the Munsell system, other colour ordering systems and the relationships between them, see the SLL Lighting Guide 11: *Surface reflectance and colour*.
