- ISO 9635-2,3&4 Agricultural irrigation equipment. Irrigation valves.

26.1.4 Quality Control

- A. Products and materials shall be from a manufacturer/supplier that operates a quality system that is registered to ISO 9000 series or approved equal.
- B. The contractor shall allow the Engineer to inspect the Works the Contractor shall give the Engineer a minimum of 24 hours notice of carrying out the activities on site.
- C. The contractor shall notify the Engineer 72 hours prior to the inspection of the above. Such notification shall be given by a written inspection request (in a format acceptable to the Engineer) each and every time various areas of the work are to be carried out or covered up so as to prevent subsequent inspection.
- D. These activities shall be identified as hold points in the Contractor's programme and inspection and test plans.
- E. If the Contractor does not notify the Engineer in sufficient time to allow for his inspection prior to covering up or complete installations governed by a hold point, the Contractor shall remove all such materials / equipment as deemed necessary by the Engineer to verify compliance of the work. Any delays, additional work or additional costs attributed to the above shall be at the Contractor's expense.

26.1.5 Additional Conditions

- A. The Engineer may take any reasonable action necessary to control damage or protect the health, safety, and welfare of the public in the event of problems involving the existing network. Such action on the part of the Engineer shall not relieve the contractor of any responsibilities related to the problem.
- B. No part of this work shall be performed or installed in any location or manner which may endanger the health, safety, or welfare of the public now or in the future. Means, methods, techniques, sequencing, etc. are the sole responsibility of the contractor.
