

- a. Size, profile and dimensions of all materials used.
- b. Connection and anchorage details.
- c. Lifting devices, locations and handling limitations.
- d. All openings, sleeves, inserts and other provisions in full co-ordination with all trades in the Contract.
- e. Identification number for each element.

F. Submit Fabrication Records

1. A record shall be kept for every piece of GRC element produced showing the following minimum information.
 - a. Identification number
 - b. Date of casting
 - c. Inspection and test results
 - d. Ref. Shop drawing number
 - e. Date of delivery to site

G. Samples

1. Submit samples of sufficient size to illustrate surface color, finish, and texture for the Engineer's approval.

H. Mock-up

1. The Contractor shall prepare a mock-up meeting the requirements of Section 01400 for at least the following installations or as requested by the Engineer.
 - a. GRC wall and fascia panels (3m x 2m) complete with anchors, control joints, expansion joints, etc...
 - b. Provide each sample wall panel using only the approved materials, together with connectors and joint sealant, shown or specified for final work.
 - c. Obtain Engineers acceptance of visual qualities for each sample panel before proceeding with the final work.
 - d. Retain each sample panel mock-up during the construction period as a standard for judging completed masonry work.
2. Do not alter, move or destroy mock-up until work is completed.
