

2.1.11 Parking Demand & Supply → Calculate the parking demand based on DoT parking rates. State the parking demand as calculated per the DoT parking rates and land-use without applying any reduction factors. State the parking supply as per the current proposal.

The Reviewer will assess the application and determine the relevant category.

- If only a Circulation Plan for small developments is required, prepare a Circulation Plan addressing all relevant items as per the instructions provided in → Chapter 3.
- If a TIS/ TMP is required, proceed with the Methodology Report according instructions in → Chapter 4.

**TIS/ TMP only** → The Reviewer may be able to define a preliminary study area for the development based on experience and knowledge of the area. The final extent of the required study area will however be defined in Stage I of the TIS process (Methodology Report).
