

21.1.5 Quality Control

- A. Prior to dispatch of any product and/or material from source the Contractor shall notify the Engineer in writing in sufficient time to allow the Engineer the opportunity to inspect and test the product and/or material prior to delivery in accordance with the requirements of the DMAT-ADM specification.
- B. Products shall be from a manufacturer/supplier who operates a quality management system which is registered to ISO 9000 series or an approved equivalent.
- C. To allow the Engineer to inspect the Works the Contractor shall give the Engineer a minimum of 24 hours notice of carrying out the following activities on site.
 - i. Installation of pipeline.
 - ii. Hydrostatic testing of pipeline.
 - iii. Deflection measurement of pipeline.

21.1.6 Delivery, Storage and Handling

- A. Delivery, storage and handling of products and materials shall be in accordance with the manufacturer's recommendations, the DMAT- ADM specification and the following provisions:
 - i. No pipes and fittings shall be stored on site for longer than 6 months and the ordering of materials by the contractor shall be planned to ensure that the 6 month period is not exceeded.
 - ii. Delivery storage and handling shall at all times be performed in a manner to avoid product damage.
 - iii. Pipes and fittings shall not come in contact with any sharp projections that may cause damage to the pipes and fittings during transportation loading and unloading. Ensure that pipes and fittings are well secured during transit and adequately supported along their length. Do not allow pipe to overhang the end of a vehicle during transportation.
