

## **10 PROJECT ALTERATION PROCEDURES (SECTION 01120)**

### **10.1 Part 1 General**

#### **10.1.1 Related Sections**

Section 01555 - Site Facilities

Section 01560 - Temporary Controls

### **10.2 Part 2 Products**

#### **10.2.1 Products for Patching and Extending Work**

- A. New materials shall be as specified in product sections; the Contractor shall match existing Products and work for patching and extending work with the approval of the Engineer.
- B. Type and quality of existing products shall be determined by inspecting and testing Products where necessary, referring to existing Work as a standard.

### **10.3 Part 3 Execution**

#### **10.3.1 Examination**

- A. The Contractor shall verify to the Engineer that demolition is complete and areas are ready for installation of new Work. The Contractor shall seek all approvals from the Engineer before work commences.
- B. Beginning of restoration Work means acceptance of existing conditions.

#### **10.3.2 Preparation**

- A. The Contractor shall cut, move, or remove items as necessary for access to alterations and renovation Work. He shall replace and restore the items at completion.
- B. The Contractor shall remove unsuitable material not marked for salvage, such as rotted wood, corroded metals, and deteriorated masonry and concrete. He shall replace materials as specified for finished Work.
