

701.05	Ozone Depletion Potential (ODP) Material Management: <p>For all new buildings:</p> <p>A. Installations of heating, ventilation, and air conditioning (HVAC) and refrigeration equipment must contain refrigerants with zero ozone depletion potential (ODP) or with global warming potential (GWP) less than 100, with the exception of equipment containing less than 0.23 kilograms (kg) of refrigerant;</p> <p>B. Fire suppression systems must not contain any ozone-depleting substances (Chlorofluorocarbons [CFCs], Hydrochlorofluorocarbons [HCFCs] or Halons).</p> <p>For existing equipment:</p> <p>A. CFC and halon-based materials are not to be used for any purposes;</p> <p>B. From 1 January 2030, HCFC based materials or any other material having any ODP are not to be used for any purposes;</p> <p>C. The venting or direct discharging of any refrigerants during equipment maintenance is strictly prohibited; and</p> <p>D. The recovery, reclamation, recycling and reuse of refrigerants must be practiced at all times.</p>
701.06	Recycled Content <p>For all new buildings, recycled content must account for at least five percent (5%) of the total volume of materials used in the construction of the building.</p>
701.07	Regional Materials <p>For all new buildings, building materials available regionally must comprise at least five percent (5%) of the total volume of materials used in the construction of the building.</p>
701.08	Composite Wood Products <p>For all new buildings, composite wood products used in the interior of the building must not contain added urea-formaldehyde resins.</p>
