

Chapter 35 - Referenced Standards

This chapter lists the standards that are referenced in various sections of this document. The standards are listed herein by the promulgating agency of the standard, the standard identification, the effective date and title, and the section or sections of this document that reference the standard. The application of the referenced standards shall be as specified in Section 102.4.

The *building official* may approve products, materials and building systems or components that are manufactured to the latest editions of international standards other than those referenced within these codes when, in the opinion of the *building official*, such products meet or exceed the referenced standards. Such comparable standards include, but are not limited to, United Arab Emirate Standards, British Standards, European Norms (EN) Standards, and International Organization for Standardization (ISO) Standards. The designer shall submit written certification that the proposed comparable standard is consistent with the design and installation requirements of this code and other affected standards. In the event another standard is used, the designer shall be limited to the provisions within that standard and shall not concurrently apply provisions from any other similar standards.
