

5.3. Open Space Hierarchy Plan

An Open Space Hierarchy Plan must be provided as part of the master plan submission to DDA. It must include the location of different open space typologies as illustrated in Figures 5.1.

For Community, District and Sector parks only, the location of associated car parking must be shown in the plan, as well as confirming that the minimum area of required parking is not included within the park area and excluded from the overall 10%.

An accompanying table that provides the areas for all open spaces within the master plan must also be submitted to DDA outlining that the necessary open space provision has been met. Table 5.3 provides an example of the information that must be provided.
