

By selecting 'Roadway 1' in the Project Tree, this can edit the characteristics of the road:

- The total width of the road
- The number of lanes
- Specifying the road as a „One-way street'

See Figure 171.

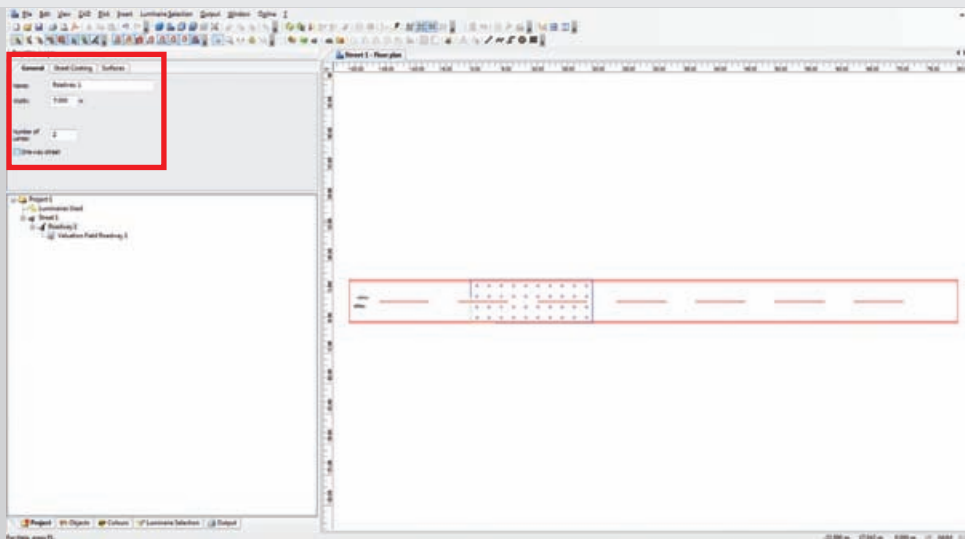

Figure 171

Under the 'Street Coating' tab may be specify the street coating. The standard reflection factor of the surfaces (R3 is the default option in DIALux) is determined by the q_0 value, which is also given as default for each surface (q_0 for R3 is 0.070) - see Figure 172.
