

1 ELECTRO MECHANICAL (SECTION 15000)

1.1 Part 1 General

1.1.1 Related Sections

- A. These Specifications shall be read in conjunction with all other Contract Documents and the Contractor shall comply with all the provisions contained in these documents. The Contract Documents are deemed to be complementary and to describe and provide for a complete Work.
- B. Any clauses of the Specifications, relating to work or material not required by the Contract are judged not to apply. In case of contradiction or discrepancy between any two articles or clauses of these specifications, the clause, which stipulates the more restrictive condition for the Contractor, shall be binding.

1.1.2 Standard Units

- A. Whenever reference is made to Standards such references are deemed to include the words "or equivalent standard subject to the prior approval in writing by the Engineer". If the Contractor proposes the use of alternative standards then those specified, he shall allow sufficient time for the Engineer for checking that materials, to be supplied under alternative standards, are acceptable. No claim for delay arising as a result of time required for carrying out such tests will be accepted. ADDC – ETISALAT and Civil Defence Standards together with the USA Standard NFPA must be observed.
- B. Legal SI units and symbols only shall be used for the dimensioning and quantification of the entire works.

1.1.3 Engineer's Approval

- A. The Contractor shall not order any material nor execute any works without having the Engineer's prior approval to the materials and/or the methods he proposes to employ. He shall not thereafter modify the source of supply or working methods without the Engineer's consent. Any approval given by the Engineer shall not relieve the Contractor from his responsibilities under the Contract.

1.1.4 Manufacturers

- A. Manufacturer shall be approved to:
