Submission Procedure

The conceptual flow process detailing procedure related to the Informational NOC is presented in Figure 5 below.

Figure 5: Flow Process Detailing Procedure Related to the Informational NOC

2.3.2.2 Preliminary Design Stage

The basic requirements related to this stage are as follows:

- to develop preliminary design based on the design guidelines and requirements agreed with the respective SAUP, and
- to select the utility arrangement options that suit the ROW plan.

The purpose of developing the preliminary design is to:

- make the SAUP well aware of the extent of proposed works,
