

13.1.6 Submittals

13.1.6.1 Product Approval

1. The contractor shall submit material approvals for all the materials, which are proposed to be used in the contract, sufficiently in advance, to the Engineer, prior to purchase, in order to verify compliance with the specifications.
2. All materials shall be brought to site in originally sealed packs, boxes, and clearly indicating the following:
 - a. Name of manufacturer,
 - b. Suppliers name.
 - c. Product name.
 - d. Product description.
 - e. Trade mark and denomination of the material,
 - f. Manufacturing and expiry dates,
 - g. Batch number.
 - h. Identification number of manufacture's batch,
 - i. Storing conditions.
 - j. Manufactures technical data.
 - k. Catalogues, diagrams and drawings
 - l. Application instructions.
 - m. Mix design (if applicable).
3. The technical specifications of each material/product shall give all the necessary indications, in particular (as applicable):
 - a. Designation of the product, sizes and components,
 - b. Field of application and range of action, limitations
 - c. Shelf life, pot life,
 - d. Characteristics, properties and Codes/Standards used for same characteristics,
 - e. Quality system.
4. Any material used, which is not approved, shall be removed from the site and the Contractor shall replace it at his own cost.
