

- e) In case of fire, the unit/station needs to be emergency tripped through the emergency push buttons provided,
- f) Fire tenders shall be immediately summoned,
- g) Guide authorities on all safety related issues,
- h) Direct all operations to stop within the affected area taking into consideration priorities for safety of personnel, minimize damage to the plant, property, environment and minimize loss of materials.

11.16.6 Critical Injury

The following emergency response procedure shall be implemented when critical injury occurs:

- a) Do not move a seriously injured person unless it is a life threatening situation
- b) Call the Safety Officer and give your name, location, building and telephone number. Give as much as information as possible regarding the nature of the injury or illness, whether or not the victim is conscious, etc. Advise the safety officer of the injury, if possible, and if the person requires an ambulance. You have the option of calling ambulance directly if you believe the injury is life threatening.
- c) Return to the victim and attempt to keep him as calm and comfortable as possible. Do not move the victim unless necessary to prevent further injury,
- d) First aid should only be given to the victim by a trained person,
- e) Remain with the victim until a Safety Officer or an ambulance arrives,
- f) Advise the officials on the scene of the illness or injury,
- g) Person with serious illness or serious injuries shall be transported immediately to the nearest hospital.
