

# Site Levels

16

## Site Levels

- Base site level for promenades and streets set at **+3.5m.** above HAT (highest astronomical tide)
- Site level inside parks is set at **+2.7m.**

## Bridges & Causeways

- Bridges are designed to allow **8.5m.** clear for navigation purposes where they cross the Creek extension.
- Road connections over linked secondary water bodies are designed as causeways.

## Gate Levels

- Gate levels for each plot are set at the finished level for the right of way at the plot boundary, at the plot entrance.
