

- b. Doors for kiosks shall be fitted with self-locking stays arranged to hold them open at 135°.
- c. All doors shall be fitted with externally locking handles
- d. Catches for locks or latches shall be reinforced with steel plates.
- e. Seals shall be continuous all around and mechanically fixed.
- f. Seals shall be EPDM.

11. Hardware

- a. All hinges, latches, stays, bolts, nuts and other hardware shall be stainless steel grade A304 or better.

12. Kiosk Lighting and Power

- a. Kiosks shall be fitted with a suitable corrosion proof fluorescent light fitting for general use, arranged to illuminate the face of the RTU. It shall be complete with "seal type" on/off switch, inside the kiosk, adjacent to the kiosk door.
- b. An external weather proof bulkhead light shall also be fitted above the door.
- c. A switched 13 Amp 240 Volt AC utility socket shall be provided inside the kiosk.

13. Kiosk Heating

- a. If noted on drawings, anti-condensation heaters shall be installed to both sides of kiosks. Heaters shall be wall mounted and of robust construction.
- b. Mechanical guards shall be fitted to all heaters.
- c. Heaters shall be supplied at 240 V a.c and controlled by a wall mounted humidistat.

14. Air Conditioning

- a. Split AC units shall be provided for all Kiosks, unless otherwise directed by the Engineer.

15. Installation

- a. Kiosks or enclosures shall be mounted on a smooth concrete surface in the approved position.
