

Figure 35. Window at 1200 mm with fixed glass at 900 mm from the floor

5.15. Switches

Switch controls and electric outlets shall be installed between 900 mm and 1200 mm height and be located a minimum of 600mm from any corner.

The switch plate shall present at least a contrast of 30 points LRV in relation with the surrounding wall.

It shall be possible to activate it with an elbow.

5.16. Glass surfaces

All glass surfaces that could be confused with doors or openings, as well as the glass doors that do not have elements that can be identified, such as frames or handles, shall contain visual elements that guarantee its detection.

The marks shall consist of two horizontal bands, each at least 100 mm high, and shall have a reflectance contrast with the glass background of at least 30 points LRV (Light Reflectance Value).
