

BS EN 10255	Non-alloy steel tubes suitable for welding and threading. Technical delivery conditions
BS EN 10296-2	Welded circular steel tubes for mechanical and general engineering purposes. Technical delivery conditions. Stainless steel
ISO 7599	Aluminum and aluminum alloys. Anodizing Method for specifying decorative and protective anodic oxidation coatings on aluminum.
ISO 1461	Hot dip galvanized coatings on fabricated iron and steel articles. Specifications and test methods.
ISO 4624	Paints and varnishes. Pull off test for adhesion.
ISO 15607	Specification and qualification of welding procedures for metallic materials. General rules';
ISO15609-1	Specification and qualification of welding procedures for metallic materials. Welding procedure specification. Arc welding'
ISO 9000 series.	Quality management systems.
PD 970	Wrought steels for mechanical and allied engineering purposes. Requirements for carbon, carbon manganese and alloy hot worked or cold finished steels

2.1.4 Submittals

2.1.4.1 Products and Materials Approval.

A. In order to verify compliance with the specification the Contractor shall submit information for all products and materials used in the Works to the Engineer for approval sufficiently in advance of their use in accordance with the Contract programme allowing for ordering and approval times. Reference shall also be made to Section 01600 of the specification on products and materials approval. Information to be submitted shall comprise but not necessarily be limited to:

1. Manufacturer's technical data and certificates of compliance with this section of the specification for the following products, including laboratory test reports and all other relevant data.
 - a) All items of miscellaneous metalwork including each type of connection. Include internal and independent test certificates for the properties claimed.
