

TABLE OF CONTENTS

1. Introduction	1
2. MA'LEM DUBAI	1
3. Power Supply Master Plan Requirements	1
3.1 Technical Requirement	2
3.1.1 Location and Layout of the Project	2
3.1.2 Nature of the Project	2
3.1.3 Total Connected Load (TCL) and Maximum Demand (MD) of the Project	2
3.1.4 Distribution Renewable Resources Generation (DRRG)	2
3.1.5 Power Factor	3
3.1.6 Load Characteristics	3
3.1.7 Power Supply Voltage	3
3.1.8 Substation Plot Sizes	3
3.1.9 Location of Substation Plot	4
3.1.10 The 132/11kV Substation Plot Verification Requirement	4
3.1.11 Site Plan for 400kV and 132kV Substation	4
3.1.12 Undertaking to Clear Services within the Substation Plot	5
3.1.13 Corridors	5
3.1.14 LV Network	7
3.1.15 Policy on Construction of 400kV and 132kV Substations	7
3.1.16 Project Parameter Report (PPR) for 132/11kV Substations	7
3.1.17 Requirements for 11kV Network/Design Approval	8
4. Backup Power Generators for Major Projects	9
5. Coordination and General Requirements	9
6. Power Supply Master Plan Process Map	13
7. Annexures	
7.1 List of Documents to be Submitted	14
7.2 Plot-wise Load Details Format	15
7.3 Standard 400/132kV Substation Setting Out Plan	16
7.4 Standard 132/11kV Substation Setting Out Plan	17
7.5 The 132/11kV Substation Plot Verification Guidelines	18
7.6 132kV Typical Duct Bank Details for Road Crossing	19
7.7 DEWA Circular Regarding Backup Generators	20
7.8 Standard Cross-section Details Format	21
7.9 File Naming Format	22
7.10 II&P Department Requirements for Digital Drawing Submission of Power Supply Master Plan	23
