

1.3. Site and Aerial Photographs/ Topography

A satellite image of the site must be provided in the submission to DDA which includes the site boundary.

The images and pictures must illustrate the overall character and qualities of the site and its context. It must focus on unique and noteworthy features, to allow a coherent assessment of the site.

The images to be provided must illustrate the following features, as a minimum:

- Visible topographical features such as wadis, hills, mountains or man-made elevations;
- Natural features such as existing vegetation, water bodies or significant habitats;
- Existing structures or infrastructure within the site; and
- Valuable views to-and- from the site.

The location and direction of pictures must be indexed on a plan or properly described.
