

- luminous ceilings 172
- luminous efficacy 78, 80–81
- luminous efficiency functions 2, 20
- luminous exitance 6
- luminous flux 3, 77
 - distribution, luminaire classification 105
 - as a function of temperature, fluorescent lamps 62
 - lamp types 80–81
- luminous intensity
 - distribution, luminaire classification 105–106
 - emergency lighting 143
 - measurement 3
- LV (Low Voltage) Directive 100
- magnifiers 184
- maintained illuminance 280
- maintenance 278–286
 - daylighting 139
 - emergency lighting 153–154
 - lighting design 121, 280
 - road lighting 226
- maintenance factor (MF) 280–285
- manual switching 115, 126–127
- materials, luminaires 85–86
- measurement methods 3–6, 272–277
- measurement units 5–6
- meeting rooms 167, 187, 190
- mercury gas discharge 50
- mercury vapour lamps *see* fluorescent lamps; high pressure mercury lamps
- mesopic vision 25, 121, 289
- mess rooms 181–182
- metal halide lamps 66–69, 80, 112
- MF (maintenance factor) 280–285
- modes of appearance 42–44
- Modified Photopic Observer 2
- motion detectors *see* presence detectors
- mounting surfaces, flammability 108
- multi-occupancy dwellings 254
- multi-phosphors 61, 63
- museums 198–202
- music rooms 187, 190
- night vision 2
- noise rating (NR) 93–94
- object modes 43
- occupant controls 126–127, 288
- office lighting 156–172
- oil lamps 82–83
- operating conditions
 - hazardous situations 144, 174, 177
 - industrial lighting 174
 - luminaire classification 106–107
 - performance verification 270
- operating theatres 212–213
- operational costs 121, 287
- optical control, luminaires 86–91
- output ranges, lamp types 80–81
- overhangs 138
- overheating 108, 215
- painted surfaces 89, 161, 279
- parks *see* public areas
- PCA (polycrystalline alumina) 72
- pedestrian areas 224–225, 230–233
 - luminaires 98–99
 - see also* public areas
- perception, visual 41–44
