

- ii. Products shall not come in contact with any sharp projections that may cause damage during transportation loading and unloading. Ensure that products are well secured during transit and adequately supported along their length. Do not allow products to overhang the end of a vehicle during transportation.
- iii. The flanges of pipes and fittings shall be protected by wooden discs attached by means of service bolts or by other approved means. Service bolts shall not be incorporated in the works.
- iv. The Contractor shall visually inspect all products upon delivery to site and report any damage to the Engineer.
 - Any products damaged during delivery, storage and handling shall be marked by the Contractor and set aside.
 - Proposals for repair of any damaged products shall be submitted in writing to the Engineer for approval.
 - Any damaged products deemed unsuitable for repair by the Engineer shall be removed from site and replaced.

27.2 Part 2 Products

NOT USED

27.3 Part 3 Execution

27.3.1 Installation

Install products in accordance with manufacturer's instructions.

- i. Provide qualification details of the manufacturer's technical expert to be assigned to the Contract. The technical expert shall have expertise, experience and skills necessary for advising and monitoring all aspects of transport, storage, handling, installation and testing of products as appropriate.
- ii. The technical expert shall provide comprehensive technical assistance to the Contractor throughout the Contract and regularly monitor the Contractor's activities and report on shortcomings.
- iii. The Contractor shall provide the Engineer with copies of all instructions advice or reports given by the manufacturer's technical expert to him. The technical expert shall immediately inform the Engineer of any omission, variations and detractions from the specification.
