

# Estidama construction submission at Certificate of Completion application

## PW-R2: Exterior Water Monitoring

- ☐ Updated narrative describing how the requirements of the credit have been met
- ☐ Manufacturer's data and as-built drawings clearly indicating the type, extent and locations of all metering, and central monitoring system
- ☐ Photographic evidence confirming installation of specified meters and central monitoring system
- ☐ Written commitment from the building owner to submit all exterior water monitoring data to Estidama (if requested)

## RE-R1: Minimum Energy Performance

- ☐ Updated Energy Model Template summarizing the dynamic energy simulation, confirming that the minimum requirements of this credit have been achieved

## RE-R2: Energy Monitoring and Reporting

- ☐ Updated brief narrative describing how the requirements of the credit have been achieved
- ☐ Energy system schematics illustrating the metering strategy confirming that the required level of metering has been achieved
- ☐ Manufacturer's data and as-built MEP layout drawings clearly indicating the type, extent and locations of all metering, and the central monitoring system
- ☐ Photographic evidence confirming installation of specified meters and central monitoring system
- ☐ Written commitment from the owner to submit all energy monitoring data to Estidama (if requested)

## RE-R3: Ozone Impacts of Refrigerants & Fire Suppression Systems

- ☐ Updated narrative describing how the project meets the credit requirements
- ☐ Manufacturer's information for all installed refrigerants and gaseous fire suppression systems confirming ODP of each refrigerant and gas is zero

## SM-R1: Hazardous Materials Elimination

- ☐ Evidence of purchase indicating that no ACMs or CCA-treated timber were used in the project as per the Credit Requirements
