

Chapter 6

RESERVED FOR FUTURE PROVISIONS

In preparing the wind load provisions contained within this standard, the Wind Load Subcommittee (WLSC) of ASCE 7 established as one of its primary goals the improvement of the clarity and use of the standard. As a result of the efforts of the

WLSC, the wind load provisions of ASCE 7 are presented in Chapters 26 through 31 as opposed to prior editions wherein the wind load provisions were contained in a single section (previously Chapter 6).
