

21.1.11 Pollution Control

- A. The Contractor shall provide methods, means, and facilities to prevent contamination of soil, water, and atmosphere from discharge of noxious, toxic substances, and pollutants produced by maintenance operations.

21.1.12 Rodent Control

- A. The Contractor shall provide methods, means, and facilities to prevent rodents from accessing or invading premises.

21.1.13 Plantations and Trees (Soft Landscape)

- A. Soft Landscape Works planted outside the premises of plots are the property of the Government.
- B. No one is authorised to remove any plantations, tree or grass.
- C. The Contractor shall inform the Engineer if any soft landscape is conflicting with the works. The Engineer shall approach DMAT and the Town Planning for realignment of the concerned work.
- D. The Contractor shall protect plants and grass from excavation, spoils or other maintenance materials, throughout the period of contract.

21.1.14 Work Sequence

- A. A sequence of work shall be adopted such as to permit the satisfactory completion of the Works and to limit disturbance and damage to a minimum.
- B. Materials and equipment used in the execution of the Works shall be of a design and be used in a manner approved by the Engineer.
- C. Due to the importance of the effluent for irrigation it is essential that no infiltration of ground water into chambers or reservoirs occur. This means that workmanship of the highest standard only will be accepted.
- D. The Engineer may at any time withdraw his approval to the Contractor's method of working and the Contractor shall immediately adopt another method of working and if such change shall be required to achieve satisfactory progress or workmanship the Contractor shall have no claim against DMAT for costs incurred by him in changing the method of working or in the provision and use of other plant or equipment.
