

<b>Condensation</b>	The process through which a gas or vapour changes to liquid form. Also defined as the water which is produced in this process.
<b>Construction activity</b>	Includes all activities that are part of new construction, alteration, repair, maintenance, refurbishing, and any other physical changes to a building.
<b>Construction and demolition waste</b>	Waste generated from construction, renovation, and demolition or deconstruction of structures. Land clearing debris including soil, vegetation and rocks are typically not considered construction and demolition waste.
<b>Contractor</b>	Natural or considerable person registered and licensed to practise contracting profession in the Emirate of Dubai.
<b>Control systems</b>	Controls that allow users to change/adjust the level of lighting and air conditioning in a space.
<b>Control zone (HVAC)</b>	A space or group of spaces with heating or cooling requirements that is sufficiently similar so that desired conditions (e.g. temperature) can be maintained throughout by using a single controller. The zone may be part of a larger space, an individual office or a small dwelling.
<b>Cooling coil</b>	A coiled arrangement of tubing or pipe for the transfer of heat between a cold fluid and air.
<b>Cooling load</b>	The amount of cooling that a building will require to meet the conditions specified by Dubai Municipality. The cooling load will be determined by the output of the Heat Load Calculation required by Dubai Municipality.
