

5.4.4. Fully encased composite columns	76
5.4.5. Partially-encased members	77
5.4.6. Filled composite columns	78
5.5. DESIGN AND DETAILING RULES FOR MOMENT FRAMES	79
5.5.1. Specific criteria	79
5.5.2. Analysis	79
5.5.3. Rules for beams and columns	79
5.5.4. Beam to column connections	80
5.5.5. Condition for disregarding the composite character of beams with slab	80
5.6. DESIGN AND DETAILING RULES FOR COMPOSITE CONCENTRICALLY BRACED FRAMES	81
5.6.1. Specific criteria	81
5.6.2. Analysis	81
5.6.3. Diagonal members	81
5.6.4. Beams and columns	81
5.7. DESIGN AND DETAILING RULES FOR COMPOSITE ECCENTRICALLY BRACED FRAMES	82
5.7.1. Specific criteria	82
5.7.2. Analysis	82
5.7.3. Seismic links	82
5.7.4. Members not containing seismic links	83
5.8. DESIGN AND DETAILING RULES FOR STRUCTURAL SYSTEMS MADE OF REINFORCED CONCRETE STRUCTURAL WALLS COMPOSITE WITH STRUCTURAL STEEL ELEMENTS	84
5.8.1. Specific criteria	84
5.8.2. Analysis	84
5.8.3. Detailing rules for composite walls	84
5.8.4. Detailing rules for coupling beams	85
5.9. DESIGN AND DETAILING RULES FOR COMPOSITE STRUCTURAL WALLS	86
5.9.1. Specific criteria	86
5.9.2. Analysis	86
5.9.3. Detailing rules	86
6. PERFORMANCE-BASED SEISMIC DESIGN REQUIREMENTS FOR TALL BUILDINGS	87
6.1. SEISMIC ANALYSIS PROCEDURES FOR TALL BUILDINGS	87
6.2. REQUIREMENTS FOR ANALYSIS MODELING	88
6.3. PERFORMANCE-BASED SEISMIC DESIGN STAGES OF TALL BUILDINGS	90
6.3.1. Design Stage (I – A): Preliminary Design (dimensioning) with Linear Analysis for Controlled Damage/Life Safety Performance Objective under (E2) Level Earthquake	90
6.3.2. Design Stage (I – B): Design with Nonlinear Analysis for Life Safety / Controlled Damage Performance Objective under (E2) Level Earthquake	90
6.3.3. Design Stage (II): Design Verification with Linear Analysis for Minimum Damage/Immediate Occupancy Performance Objective under (E1) Level Earthquake
