

ENVIRONMENTAL CHECKLIST

Project:

Date:

Page 1 of 4

	Yes	No	Maybe
1 Water: Will the proposal result in:			
Changes in currents, or the course of direction of water movements, in either marine or fresh waters?			
Changes in absorption rates, drainage patterns, or the rate and amount of surface water runoff?			
Alterations to the course or flow of flood waters?			
Change in the amount of surface water in any water body?			
Discharge into surface waters, or any alteration of surface water quality, including but not limited to temperature, dissolved oxygen or turbidity?			
Alteration of the direction or rate of flow of ground waters?			
Change in the quantity of ground waters, either through direct additions or withdrawals, or through interception of an aquifer by cuts or excavations?			
Deterioration in ground water quality, either through direct injection, or through the seepage of leachate, phosphates, detergents, waterborne viruses or bacteria, or other substances into the ground waters?			
Reduction in the amount of water otherwise available for public water supplies?			
2 Landform: Will the proposal result in:			
Unstable earth conditions or changes in geologic substructures?			
Disruptions, displacement, compaction or overcovering of the soil?			
Change in topography or ground surface relief features?			
The destruction, covering or modification of any unique geologic or physical features?			
Any increase in wind or water erosion of soils, either on or off the site?			
Changes in deposition or erosion of beach sands, or changes in siltation, deposition or erosion that may modify the bed of the ocean, bay, or inlet?			
Changes in deposition or erosion or changes in siltation, deposition or erosion that may modify the channel of a wadi or stream, or the bed of a lake?			
Placing fill below the ordinary high water mark of wadis and streams?			
Cut or fill placement through swamps, marshes, bogs, and other similar areas that are frequently inundated or saturated by ground water?
