

- viii) Hardness, scratch resistance (identify test method)
 - ix) If relevant, abrasion (Taber or other)
 - (a) Accelerated exposure and ageing tests
 - x) If relevant, weathering accelerometer (specify type)
 - (b) Scribed salt spray test
 - xi) If relevant, scribed outdoor panel test
 - (e) Chemical resistance test
 - xii) At least 6 month immersion test where relevant.
3. For 2 pack materials.
- i) Pot life of pack sizes supplied at 300°C. Useable life of freshly mixed components. Induction periods required before application
 - ii) Additional information
 - iii) Mixing and application instructions
 - iv) Health and safety data sheet in accordance with EU requirements
 - v) Thinning instructions
 - vi) Application data including equipment and nozzles and pressures to be used
 - vii) Surface preparations
 - viii) Limiting conditions of use
 - ix) Storage instructions

1.1.7 Qualifications of Suppliers and Applicators

- A. Coating manufacturers supplying to the work directly or through agents or representatives shall have:
- 1. Research and development facilities (local or overseas) or else a technological co-operation with a company or body with such facilities, quality control facilities, equipment suitable for quality production.
