

6.5.4.	Variable Frequency Drives	67
6.5.5.	Motor Control Centre	67
6.5.6.	Protection Device.....	68
6.5.7.	Power Factor Correction Capacitors.....	68
6.5.8.	Earthing.....	68
6.5.9.	Lightning Protection	69
6.5.10.	Lighting	69
6.5.11.	Uninterruptible Power Supply	69
6.5.12.	Cables.....	70
6.5.13.	Mobile Generator Junction Box / Stand-by Generator with ATS	70
6.6.	Instrumentation	71
6.6.1.	Level Measurement Sensors	71
6.6.2.	Methods of Flow Measurement	72
6.6.3.	Compatibility to SCADA.....	73
6.6.4.	Control Systems.....	73
6.6.5.	Pump Control Philosophy	73
6.6.6.	Fieldbuses.....	74
6.6.7.	SCADA System.....	74
6.7.	Structural Design	76
7.	PUMPING MAIN DESIGN	77
7.1.	Introduction	77
7.2.	Pipe Material Selection	78
7.3.	Hydraulic Design of Pumping Mains.....	78
7.3.1.	Design Considerations.....	78
7.3.2.	Friction Head Losses	79
7.3.3.	Localised Head Losses	80
7.4.	Structural Design	81
7.4.1.	Internal Forces.....	81
7.4.2.	Temperature Range.....	81
7.4.3.	Unbalanced Thrust	81
7.5.	Valves	82
7.5.1.	Valve Selection	82
7.5.2.	Valve Losses.....	82
7.5.3.	Flushing Flow.....	82
7.5.4.	Maximum Draining Flow	83
7.5.5.	Draining Time.....	83
7.5.6.	Actuators.....	84
7.5.7.	Equipment Isolation Valves	84
7.5.8.	Check and Flap Valves.....	84
7.5.9.	Air Release and Vacuum Valves	84
7.5.10.	Washout Valves	85
7.6.	Valve Chambers	86
7.6.1.	Flow Meter Chamber	87
7.6.2.	Air Valve Chamber.....	87
7.6.3.	Washout chamber.....	87
8.	DESIGN SUBMISSION REQUIREMENTS	88
8.1.	General	88
8.2.	Required Standards.....	88
8.3.	Submission Requirements.....	89
8.4.	Design Review Stages and Requirements	89
8.4.1.	General Notes.....	89
8.4.2.	Preliminary Design.....	90
8.4.3.	Detailed Design.....	91
8.5.	Connection to Existing Approval.....	92
8.6.	Compliance form.....	93
8.7.	Check list	94
8.8.	Hydraulic Modelling Shape File Data Requirements	96
