

5 Installation guideline for labor accommodation

Labor accommodation Scenarios: Recommended to add followings FTTH System arrangement inside Labor accommodation in the manual.

1) In case of permanent and large multistory labor accommodations, it is required to lay separate drop fiber cable to each room & install ONT box. Refer Appendix1- Figure 4 for more details.

2) In case of small labor accommodations with less number of rooms, Lay CAT 6- from each room Socket (maximum cable length allowed is 70mtrs) to Tel. room and terminate on patch panels installed in a cabinet. Refer Appendix1- Figure 5 for more details

6 Labelling Scheme

6.1 GAID and EID Identification Plate for each Unit/Tenant

The identification plate must be installed at the door entrance of the residential/commercial units. The identification plate material could be made of plastic plate or light metal plate with the alphanumeric characters (GAID or EID) engraved on it. The sample of identification plate must be submitted during NOC stage to the Operators for final approval.

The GAID and EID reference number detail will be made available by the Operators during the inspection stage.

Below is the example,
