

- Vertical scale denotes GC_p to be used with q_h .
- Horizontal scale denotes effective wind area, in square feet (square meters).
- Plus and minus signs signify pressures acting toward and away from the surfaces, respectively.
- Each component shall be designed for maximum positive and negative pressures.
- Values of GC_p for roof overhangs include pressure contributions from both upper and lower surfaces.
- Notation:
 - 10 percent of least horizontal dimension or 0.4h, whichever is smaller, but not less than either 4% of least horizontal dimension or 3 ft (0.9 m).
 - Mean roof height, in feet (meters).
 - Angle of plane of roof from horizontal, in degrees.
