2.3.2 NOC Requirements

The NOC can be obtained from any SAUP by fulfilling their requirements. These requirements are specific with respect to the type of NOC, however they are usually generic in nature with respect to SAUP. The details related to the documentation requirements and submission procedures based on each type of NOC are presented in the following sections.

2.3.2.1 Notice of Intent (NOI)

The basic requirement for the Informational NOI is to inform the SAUP about the initiation of the project through:

- a Notice of Intent (NOI) and
- the Letter of Award (LOA) that is issued by the client.

The NOI is not considered as NOC, but serves as a request for the information to the SAUP to release/share the information regarding any existing utilities (as built data/drawings) and/or constraints imposed by on going or planned projects within the vicinity of the development.
